

# BlueSky

## Marine Sliding Hatch - Manual or Electric

The BlueSky sliding hatch is designed for use on the wheelhouse or cockpit canopy of power craft. BlueSky is available in multiple options:

**Electric operation** - Thanks to the electrical operation the hatch is easy to use and the panel can be blocked in any desired position. The tilting and sliding mechanism in combination with the seal ensures full water tightness.

**Manual operation** - BlueSky is now available in a manual version which offers the same quality and design features as the electrically operated version. This version is a good alternative in those cases where a more economical solution is desired.

**Acrylic panel** - The acrylic panel is made from two acrylic shells with a screen print resulting in a modern design, light weight and improved insulation. This construction is unique in the marine industry.

**Glass panel - (Electric Version)** - As well as the acrylic panel the electrically operated BlueSky can also be offered with a 6 mm grey tinted glass panel. This variant is the top end of the range and offers a flush integration in the boat design.

**Cut-out size** - As a further variation to the original cut-out dimension of 770 x 720, the BlueSky roof is now also available in a smaller size, 500 x 500. This variant is available in combination with manual operation and acrylic panel only. The styling of the product is similar to the 770 x 720 variant.

### Advantages:

- Smooth operation
- Simple plug & play installation (electric)
- Insulated panels
- Modern attractive design
- Variable tilt and slide positioning
- Compact dimensions and lightweight
- Certified for Category B Area 3 use
