

Cool Top RTE 10

An ideal climate with the electric parking cooler system for trucks

This powerful rooftop air-conditioning system ensures pleasant temperatures and humidity in truck cabins. Well-rested drivers have demonstrably better concentration and therefore contribute to greater safety on the road. The compressor-driven system is prefilled with refrigerant and is connected to the 24-V vehicle battery. Installation in the existing roof opening is very simple and saves time.

High-quality components set up a high quality standard for parking coolers and ensure a long life with a minimum expenditure on maintenance. The electric parking cooler reduces engine idling times and therefore saves fuel. The low-voltage cutoff ensures that the engine will start.

- High-quality and powerful parking cooler system with high energy efficiency
- Optimum air distribution and quiet operation
- The low-voltage cutoff ensures that the engine will start
- Very easy to control via control panel or remote control
- Wide choice of vehicle-specific mounting kits
