

# See more, feel more, experience more

Aftermarket Sunroofs

# Clear as daylight: the advantages of a sunroof

### Webasto roof systems

If you are on the road, you want to experience maximum comfort. What can be better than feeling the sun on your skin, breathing fresh air and enjoying the feeling of freedom? With Webasto sunroofs, you can fulfil this desire – you can experience every trip with all your senses!

With a Webasto sunroof – open or closed – you can enjoy comfort and a vehicle interior that is bathed in light 365 days a year. At the same time, Webasto sunroofs provide high quality and reliable safety technology. You can already look forward to visible advantages.

### Bright minds want light

The number-one feel-good factor will always be light. Enjoy it as often as possible. A sunroof makes all happy with noticeably increased brightness – the appearance of an open vehicle interior immediately provides a much more pleasant atmosphere.

### Every kilometer is a joy

Every year, nine million factory-fitted Webasto roof systems throughout the world open new perspectives for car drivers: a real open-air feeling, pure driving fun, as well as that very special feeling of freedom.

### Fresh breeze for your driving performance

With fresh air, your driving becomes significantly more relaxed, more concentrated and thus more safe. A sunroof means no draughts when the side window is open; rather the air comes evenly and pleasantly from above.

### Great perspectives in regard to quality

With Webasto sunroofs, you can look not only upwards, but also assuredly forwards: Thanks to our TÜV-inspected top quality in the retrofit sector, we provide a 3 year warranty on all of our roof systems.

## All-round quality: roof systems for every need

### Family enterprise since 1901

For more than 100 years, Webasto has stood for comfort and quality and is Number 1 in the world for automobile roof systems. From classic tilt and slide roofs to lamella and solar roofs to panorama roofs and innovative convertible roofs – Webasto reliably provides millions of car drivers with more driving fun.

### We build on innovation ex works

Throughout the world, Webasto develops and produces roof systems for new cars. Here, we use innovative products, such as the first solar sunroof or the novel convertible roof system with an integrated sliding glass roof – used in the VW Eos – which combines the advantages of a convertible with those of a sunroof.

- 1936: First top for automobiles
- 1956: First steel sunroof
- 1974: Tilt and slide roof made of glass
- 1989: Innovative solar sunroof
- 2000: Provider for convertible roof systems
- 2007: Roof systems of polycarbonate
- 2010: Founding of Webasto-Edscha Cabrio GmbH

### The trust of grand brands

Like many famous automobile manufacturers, you can put your trust in the excellent quality of Webasto. Our roof systems are installed at the works of, for example: Alfa Romeo, Aston Martin, Audi, Bentley, BMW, Buick, Cadillac, Chevrolet, Chrysler, Citroën, Daihatsu, Dodge, Ferrari, Fiat, Ford, GM, Great Wall, Honda, Hyundai, Infiniti, Jaguar, Kia, Lamborghini, Lancia, Land Rover, Lincoln, Maserati, Mazda, Mercedes-Benz, Mitsubishi, Nissan, Opel, Peugeot, Porsche, Renault, Rolls Royce, SAIC, SEAT, Škoda, Smart, Subaru, Suzuki, Toyota, Volvo and VW.

### Special edition successes

In regard to their exclusive special editions, automobile manufacturers give their customers only the best things: love for details, the highest quality and very special extras. Desires that are united and perfected in Webasto sunroofs, which are being used more and more as an absolute highlight in special editions. For example, the Nissan Pulsar is exciting with its Hollandia 300 and the Citroën Cactus with its Hollandia 400. Webasto is also setting new standards in the compact car segment in this regard.

### A great feeling in a small space

Compact car drivers do not have to do without the great feeling of freedom. Quite the contrary: They gain the most advantages when retrofitting a Webasto sunroof. The car opens up visually and thus appears to be significantly larger. Retrofit your compact car with one of our sunroofs, and look forward to sunshine, fresh air and many enjoyable trips.

# Real eye-catchers: Webasto retrofit roof systems

## Hollandia 100 Big effect – small price

A generous feeling of well-lit space and the pleasant enjoyment of fresh air: The Hollandia 100 combines a modern design with technical flair, opening up open-air comfort to you at an affordable price.

*Mode of operation:  
pop-up roof*

## Hollandia 300 A super view! Even for strongly arched cars

The Hollandia 300 is now available in two versions: Entry & Comfort. Those allow an even more flexible use for a perfect integration into the vehicle interior's design.

*Mode of operation:  
tilt and slide roof*

## Hollandia 400 The highlight for your car!

With the Hollandia 400, you can experience what it is like to drive a convertible. This sporty folding roof can be opened as you prefer: from a narrow gap to a completely open roof.

*Mode of operation:  
folding roof*

## Hollandia 700 Discreet and elegant

The elegant Hollandia 700 is integrated into the roof so well that it cannot be distinguished from a roof that is installed ex works. Perfectly adapted to the vehicle interior, the sun shade completes the noble design.

*Mode of operation:  
integrated tilt and slide roof*

## Top models: design, comfort and quality

### So that you can keep safe

Webasto sunroofs stand not only for excellent quality, but also for exceptional safety. Technical features such as the Auto-Close system, the Auto-Retract system or the Protective Venus® glass ensure safe and carefree driving pleasure:

#### Protection from surprises

The Auto-Close system automatically closes your roof when you park your car. Rain, dirt and undesirable visitors stay outside.

#### Protection from mishaps

The Auto-Retract system prevents your roof from closing if the opening is not completely free. This makes it impossible to catch things, such as hands.

#### Protection from UV radiation

The tinted Protective Venus® glass reflects UV radiation and solar heat without affecting the amount of incoming light.

### Protective Venus® glass

## Close at hand: Webasto operating elements

With every sunroof, Webasto provides operating units with clever functions, advanced technology and ease of use.

### Manual operation

Simple and practical – the manual-operation model from Webasto: The latch handle with ergonomically shaped handle makes the use child's play. The opening position can be set individually.

### Electrical operation

Use one of our two different electrical operation options to reliably bring your Webasto roof system into the position you want.

Entry

Comfort

### H300 Entry and Comfort

The operating elements with its simple functionality via a three-button system for the new spoiler sunroof feature a two-layer softcoating fitting seamlessly into the existing interior decor of today's vehicles. In the **Entry version** the control element comes in black without illumination. In the **Comfort version** it is black, framed with a chromecolored ring and available in a choice of four LED illumination colors.

Comfort

### H700 Comfort

The operating unit for the H700 series with its elegant design is made of a smooth material. In addition to the standard Open/Close function the operating unit offers you extra highlights such as the Auto-Close and Soft-Touch functions for easier operation. The operating unit is available in three different colors and stylish LED lighting in selected colors.

## Something to rely on: quality from Webasto

### **Tried-and-tested quality**

Webasto sunroofs undergo internal endurance tests at the factory in order to prove their uniformly high standards in terms of weathertightness and the ability to withstand stress. In a wide variety of test series, the individual roofs are subjected to, among other things, steady rain, extreme stress, arctic weather conditions and strong soiling. Professional installation represents a further column in Webasto's philosophy of quality. This is carried out solely by highly qualified partners who are regularly trained and certified by Webasto.

The detailed test series and the excellent training of our partners make it possible for us to provide you with top Webasto quality; this is confirmed regularly by the German TÜV testing authority. Make your decision for the number-one provider of car roof systems in the world, and look forward to the 3-year warranty.
