

A perfect temperature all around

Expand the power of your vehicle's air-conditioning system and make sure that all passengers enjoy the journey by feeling relaxed, experiencing pleasant temperatures from the very start.

The advantages of your BlueCool Drive 40:

- Consistently cools the entire vehicle while you're driving
- Expands your existing vehicle's air-conditioning system
- Although quiet and compact, the system is extremely powerful
- Low-noise distribution of cooled air
- Little or no impact on the maximum recommended load (less than 7 kg)
- Low initial investment
- Operation via the 12V on-board power supply
- Webasto automotive technology, proven over many years

• Company headquarters Gilching
■ Webasto locations

For more than 75 years, the Webasto group has continued to set new technological standards – in both the original equipment sector and the aftermarket. As one of the 100 biggest suppliers in the automotive industry worldwide, we develop and produce roof, convertible as well as heating, cooling and ventilation systems. Our products help provide a better atmosphere on the road, more comfort and security, as well as increased efficiency for cars, commercial and special vehicles, motor homes and boats. An outstanding network of production facilities and dealers guarantees high-quality products, installation standards and services worldwide.

Feel the Drive

Our vacation starts en route to our holiday destination

Auxiliary air-conditioning for motorhomes

The BlueCool Drive 40 – a cool product for the entire family

Finally! Your eagerly anticipated summer vacation has arrived. Bags, kids, the whole caboodle are packed and you're hitting the road.

But when temperatures soar, the trip to your holiday destination can quickly become an exhausting one. To combat the oppressive vehicle heat, your motorhome's own air-conditioner must run at full blast. But while the driver and front passenger feel like they are in the Antarctic, the cool air barely reaches the back of your motorhome. Once the heat builds and is trapped in that space, passengers – especially the younger ones – can soon feel irritated and tired.

Comfort and convenience for the whole family

So, to reduce stress levels during the drive and to ensure that you enjoy the journey, Webasto has developed the BlueCool Drive 40 air-conditioning system. The kit is integrated into the cooling circuit of the vehicle's own air-conditioning system, which creates a total cooling circuit. So, in a flash, you've expanded your existing air-conditioner.

The best thing about it: You arrive at your holiday destination and can immediately enjoy a wonderfully cooled motorhome. So you can relax, enjoy a restful sleep and revel in that boundless vacation feeling.

I want comfort for everyone – no matter where they happen to be seated in my motorhome.

How it works

With the BlueCool Drive 40 system by Webasto, you are guaranteed to have the entire interior space of your vehicle cooled during your drive. And all this with a minimal weight increase and low retrofitting costs.

- The BlueCool Drive system is an expansion of your vehicle's existing air-conditioner **1** for the rear area of the motorhome.
- The system was especially designed to provide cooling while you drive and is operated via the running engine of your motorhome.
- The BlueCool Drive does this by utilizing the vehicle's own compressor **2** and condenser **3** which are already installed in the engine compartment.
- Cool air is generated in the additionally installed evaporator **4** which, when using a dedicated control element, enables the very easy cooling of the rear area of the vehicle **5**.
- The result: An expanded cool climate circuit, that ensures uniform cooling of the entire motorhome.

Quality is our tradition

For over a century, Webasto has been setting technology standards. With the acquisition of the air-conditioning specialist Diavia, Webasto is expanding its specific market intelligence and knowledge. That's why, as is our tradition, you get qualitatively high-grade products that are installed by our well-trained and certified dealers. And our air-conditioning system for motorhomes is actually an automotive technology that has been proven over many years.

Tips from the expert

Our BlueCool Drive 40 air-conditioner ensures a pleasant interior climate during the drive to your vacation. By utilizing a few little tricks before and during the drive, you can achieve the maximum benefit from your air-conditioner.

- Before you start out on your drive, open the windows to let the accumulated heat out of the vehicle
- To cool down, set your air-conditioner to the highest speed and to air circulation mode
- Keep the windows closed while your air-conditioner is in operation
- Cool the interior to a temperature difference of no more than 6°C to the exterior air temperature
- Never direct the air vents towards unclothed body parts or to your face

Even when it's parked, keep the vehicle at feel-good temperatures.

And this is how to do it:

- Avoid direct sunlight
- Cover glass surfaces
- Ensure cross-ventilation
- Keep the roof clean

Good to know

The only prerequisite for the BlueCool Drive 40 system is a functioning, vehicle-own air-conditioning system. Contact a Webasto installation partner to select the kit adapted to your vehicle type.

Do you still have questions?

You will find lots of useful information about the BlueCool Drive 40 system on our website and additional information relating to your nearest Webasto installation partner, illustrations on the scope of delivery and much more.

And last but not least: Stay relaxed, even if the mercury climbs above the 35°C mark. After all, you're on your well-earned vacation!
