Always the right climate for your medicines.
Heating, air-conditioning and transport refrigeration solutions for every climate and budget
Transported safely – thanks to the consistent climate in the cargo area.

Transporting medicines is a particular challenge for your fleet.

Medical products and medicines are valuable freight. Their production is often expensive and complex, and frequently their arrival is urgently awaited. These sensitive goods need to be transported as reliably and professionally as possible.

Clear guidelines laid out by the legislator
Directive 2001/83/EC of the European Union specifies underlying conditions for safe transport and professional distribution of medicines. Some countries are already planning to adopt this Directive into their own national laws.

Equip your own transport fleet now so that they meet these statutory requirements – with customized heating, air-conditioning and transport refrigeration systems from Webasto.

EU Directive 2001/83/EC, Article 80 (g):
Suppliers and distributors of medicines are responsible for:
- Ensuring compliance with the defined temperatures in the cargo area
- The use of suitably equipped transport vehicles
- Providing evidence confirming compliance with the specified temperatures
Always the right solution for your needs.

**No one knows the market requirements better than you**
What does professional transport of medical products in your region involve? The selection of individually optimized systems for equipping your vehicle depends on a number of factors:

- **Climate**
  - Region
  - External temperature fluctuations
  - Humidity

- **Medical goods class**
  - 15°C-25°C
  - 2°C-8°C
  - Varying goods classes

- **Budget**
  - Small
  - Medium
  - Large

- **Fleet**
  - Fleet equipment, Insulation, Cargo area volume

- **Routes and delivery**
  - Route distance,
  - Number of stops,
  - Frequency and duration of open load compartment doors

**No-one has more solution options than Webasto**
For many years Webasto has inspired transport companies across the world with intelligent heating, air-conditioning and transport refrigeration systems. We supply customized solutions for all imaginable application scenarios – in particular for the transport of medical products.

**Our product portfolio for safe transport of medicines:**

- **Air heaters**
The air heaters have outputs of between 2.0 kW and 5.5 kW to ensure constant temperatures throughout the cargo area of your vehicle, even in very low outside temperatures.

- **Air-conditioning systems**
Our high-performance air-conditioning solutions are compact and lightweight, and can be fitted very easily into your light-duty vehicle.

- **Control panel**
The intuitive control unit regulates all temperature situations inside the cargo area at the push of a button from the driver’s seat.

- **Data logger**
We have a number of different solutions for tracking and recording the set temperature range that can easily be integrated into your vehicle.

- **Application competence**
As a system supplier, Webasto has far-reaching experience in the integration of various technologies – tailor-made to meet your needs.

- **Individual customer solutions**
The Webasto competence center develops individual solutions for your specific needs – to your specifications.

**Your benefits**
- Reliable and customized air-conditioning solutions for light-duty vehicles
- Optimum transport of medical products
- Compliance with statutory regulations
- Recognized by hospitals and doctors
- Clear competitive advantage for your company
- Securing long-standing contracts
- Opens up new customer potential
Professional – whatever your budget.

For every application and every budget
Thanks to its modular system concept, Webasto can offer you a wide range of solutions to meet your specific needs. Here are just a few examples of our product solutions:

**The inexpensive starter.** Safe transport of medicines, ideal for small companies and subcontractors.

<table>
